Paul Oluyemi

FULL STACK WEB DEVELOPER

oluola96@gmail.com | Portfolio | GitHub | LinkedIn | Twitter

SUMMARY

Senior Full-Stack Software Engineer with extensive experience architecting secure, AI-driven ecosystems across HealthTech, FinTech-enabled Marketplaces and Security sectors. Expert in building multi-platform solutions—including mobile apps for end-users and complex web dashboards for administrators—using **Node.js, TypeScript, Python, and React Native**.

Proven track record in implementing sophisticated technical features such as **biometric voice authentication, AI risk-scoring engines, escrow payment systems, and wearable API integrations**. A strategic thinker focused on **Clean Architecture**, robust security (RBAC/JWT), and scalable cloud infrastructure (AWS) to drive organizational success.

SKILLS

- **Front-End & Mobile:** TypeScript, JavaScript, Next.js, React, React Native, Redux, Tailwind CSS, HTML5/CSS3.
- **Back-End & API:** Node.js, Express.js, Python, Django, FastAPI, Prisma, SQLAlchemy, Mongoose.
- **Database & Storage:** PostgreSQL, MySQL, MongoDB, Redis, AWS RDS, Amazon S3.
- **AI & Data Science:** PyTorch, NumPy, Biometric Analysis, Voice Embedding Pipelines, Risk-Scoring Algorithms.
- **Cloud, DevOps & Security:** AWS, Docker, Nginx, JWT, RBAC, Stripe & Paystack Integration, KYC (SmileID, QoreID), Fitbit API, WhatsApp Cloud API.
- **Testing & Reliability:** Jest, Zod Validation, TDD/BDD, React Testing Library, Swagger/OpenAPI, Python Debugger (PDB), Django Debug Toolbar.
- **Tools & Methods:** Git/GitHub, Agile/Scrum, Figma, Postman, CI/CD Pipelines, Clean Architecture, Remote Pair-Programming.

EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS

Lima Health — Freelance

Full-Stack Software Engineer | AI, Cloud & Security-Focused

SEPT., 2025 – Present

Lima Health App – A comprehensive HealthTech ecosystem designed to monitor student well-being through wearable data integration and AI-driven risk assessment.

- **Built with:** Node.js, TypeScript, Next.js, React Native, PostgreSQL, Prisma, Zod, AWS, Fitbit API, and Stripe.
- **AI Risk Engine & Automation:** Developed an intelligent scoring system to analyze health metrics, automatically calculating user risk levels and triggering real-time alerts to counselors for high-priority interventions.
- **Multi-Platform Ecosystem:** Engineered cross-platform solutions including mobile applications for **Students** and **Counselors**, alongside specialized web dashboards for **Schools** and **Super Admins**.
- **Data Integration & Payments:** Integrated **Fitbit APIs** for seamless biometric data synchronization and implemented **Stripe** to manage secure subscription lifecycles and transactions.
- **Security & Architecture:** Architected a secure backend using **Clean Architecture** principles, featuring JWT authentication, email verification, and hierarchical **RBAC** (Role-Based Access Control).
- **Cloud & Reliability:** Deployed transactional messaging via **AWS SES** and enforced strict data integrity across all RESTful endpoints using **Zod** schema validation.

TrueVoice — Freelance

Full-Stack Software Engineer | AI, Cloud & Security-Focused

SEPT., 2025 – NOV., 2025

TrueVoice – An AI-powered voice authentication and verification platform designed to prevent identity fraud using biometric voice analysis.

- **Built with:** Python, FastAPI, PyTorch, NumPy, SQLAlchemy, PostgreSQL, Docker, Nginx, and AWS.
- **Voice Authentication Engine:** Implemented speaker embedding and voice matching pipelines to enable secure voice enrollment and verification.
- **Liveness & Anti-Spoofing:** Integrated liveness detection mechanisms to mitigate replay and synthetic voice attacks.

- **Audio Processing Pipeline:** Handled audio ingestion, format normalization, transcription, and embedding extraction for reliable cross-device performance.
- **Cloud Deployment:** Deployed and managed the system on AWS, configuring compute, networking, and security controls to ensure scalability, reliability, and production readiness.

LEDDAR TECHNOLOGIES — Remote

Full-Stack Software Engineer — March, 2026 – Present

Leddar – A B2B premium leather-production marketplace connecting fashion brands with vetted artisans, covering quotes, sample production, bulk orders, escrow payments and artisan payouts.
Live: Website | Brand Portal | Artisan Portal

- **Built with:** Node.js, Express, Next.js, React, Redux Toolkit, Tailwind CSS, PostgreSQL, Prisma, Zod, Amazon S3, Paystack, and Jest.
- **Multi-Portal Platform:** Built and maintained three web apps—**Brand**, **Artisan** and **Admin** portals—on a shared REST API, covering quote requests, sample video approval, job assignment and order tracking.
- **Escrow & Payouts:** Integrated **Paystack** checkout, webhooks and transfers to hold brand payments in escrow and release stage-based artisan payouts, with commission, VAT and FIRS remittance handling.
- **KYC & Verification:** Integrated **SmileID** and **QoreID** for artisan identity and address verification, plus bank account resolution before payouts.
- **Notifications & Automation:** Delivered transactional **WhatsApp**, email and in-app notifications, PDF invoice generation, and scheduled jobs that auto-expire overdue artisan assignments.
- **Reliability:** Enforced request validation with **Zod**, documented endpoints with Swagger, and wrote **Jest** / React Testing Library suites across the stack.

ITAN GLOBAL PUBLISHING — Remote

Front-End Developer — February, 2025 – Present

Live: Reader App | Author Portal

- Built and deployed **three front-end apps** (Author, Reader, Admin) for a publishing platform
- Converted **Figma designs** into responsive, scalable web applications
- Implemented author onboarding, KYC, bank verification, and book uploads
- Integrated **Amazon S3** for file storage
- Deployed and maintained apps using **AWS Amplify**

MICROVERSE — Remote

Mentor (Volunteer) — February, 2022 – February, 2025

- Mentored junior web developers, providing technical support through code reviews.
- Proposed improvements to code organization to improve code quality and overall performance.
- Provided advice and tips on how to maintain motivation to maintain longevity in the program.

EDUCATION

MICROVERSE — January, 2022 – May, 2023

Remote Full Stack Web Development Program, Full Time

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair-programming using GitHub, industry-standard gitflow, and daily standups to communicate and collaborate with international remote developers.

THE FEDERAL UNIVERSITY OF TECHNOLOGY, AKURE — November, 2011 – October, 2016

B.Tech., Marine Science and Technology

- **Scientific Research & Methodology:** Formulated hypotheses, designed field and laboratory experiments, and analyzed results to reach evidence-based conclusions—a systematic approach now applied to debugging and system design.
- **Data Collection & Analysis:** Collected, organized, and analyzed large field datasets, building a foundation in data handling and integrity that carries directly into data-driven software development.
